IRON WEALTH OF MISSOURI.—The Missouri Ganlogical Survey, in volume one of their report, makes the
following estimate in regard to ore in the celebrated fron
region of that State—from Mountain, 22s feet high,
covering 500 acres, one mass of specular ore weighing
280,187,275 tone; average yield at furnace fifty-six per
cent, or 128,964,303 tons of pure fron. Pilot Knob,
13,972,773 tons of ore, or 7,000,000 tons of pure iron,
these two deposits will furnish about 135,000,000 tons of
fron, the ore of which all lies above the natural surface of
the country, is easily mined and furnishes the best of
metal. Raifroad iron, seventy pounds to the yard, takes
123 tons to the mile, and all the raifroads in the United
States would take of that weight of rails about 3,500,000
tons of iron, or one fortieth of the deposit above spoken
of. And this is only the ore above the surface.

LARGE TRANSACTION IN CORN.—The Memphis Appeal of the 26th uit. says:—"As an indication of the feeling in the corn market in the Mississippi valley, we have heard of the purchase recently, by Mr. Popham, of Breckinridge county, of two or three crops, embracing one hundred thousand bushels, at thirty-five cents per bushel, to be delivered at the river bank below Cairo."
